

Here are some **automatic pill dispensers with Bluetooth (or app connectivity)** that are available in Australia or ship to Australia. These are useful if you want **phone alerts, remote reminders, or app-based scheduling.**

---

## Automatic pill dispensers with Bluetooth (Australia options)

### ◆ 1. Bluetooth-enabled carousel dispenser

#### LiveFine Automatic Pill Dispenser with Bluetooth

- Connects via Bluetooth to a smartphone app
- App or manual programming for dosing schedules
- Up to 6–9 alarms per day
- 28-day pill capacity
- Lockable lid + LCD display
- Suitable for basic remote reminders LiveFine

👉 Good for: simple app control + standard home medication routines

---

### ◆ 2. Smart Bluetooth pill organiser (budget-friendly)

#### EziMedPil Bluetooth Pill Dispenser

- Bluetooth syncing with smartphone app (SmartLife-style apps)
- Up to 9 alarms per day
- Sound + light alerts + lockable design
- 28-day capacity
- Rechargeable / app-connected reminders

👉 Good for: more affordable Bluetooth option with app notifications

---

### ◆ 3. App-connected smart pill organiser (Bluetooth-style smart control)

## Cue Dose Smart Pill Organiser

- App-connected medication reminders
- Built-in alarms + smart scheduling
- Designed for tracking and adherence support
- Compact, more portable than carousel units

👉 Good for: simpler organiser with app integration rather than full automation

---

## ⚠️ Important note (Bluetooth vs “fully automatic”)

- Many Australian automatic dispensers (e.g. TabTimer or Medforte) focus on **alarms + mechanical dispensing**, but **do NOT include Bluetooth/app control**.
  - Bluetooth models are less common and usually:
    - Offer **reminders + tracking**, not full remote dispensing control
    - Still require manual refilling and initial setup
- 

## 💡 How to choose

- **Need caregiver monitoring + phone alerts** → go Bluetooth/app-enabled (LiveFine, EziMedPil)
  - **Need strict timed dispensing without app** → consider non-Bluetooth carousel dispensers
  - **Complex medication schedules** → larger carousel units (but usually no Bluetooth)
- 

If you want, tell me your budget and whether this is for elderly care, Parkinson's, ADHD, etc.—I can narrow it down to the best specific model available in Australia right now.

## Bluetooth Automatic Pill Dispensers

### ◆ 1. LiveFine Bluetooth Automatic Pill Dispenser

- Bluetooth connection to a smartphone app
- App lets you set schedules, reminders, and track doses
- 28-day capacity with rotating carousel
- Audio + visual alarms + lockable lid
- Up to ~6–9 doses per day depending on setup
- Designed for caregiver monitoring via app

👉 This is one of the most common Bluetooth-enabled dispensers in this category.

Walmart.co... +1

#### Good for:

- Remote monitoring
- Elderly care / family oversight
- Users who want phone notifications + alarms

---

### ◆ 2. LiveFine Smart WiFi / App-enabled variant

- Similar carousel-style dispenser
- App-controlled scheduling (Bluetooth/WiFi variants exist)
- Large LCD display with alarms

- Lockable for safety
- 28-day pill capacity
- Multiple dosing times per day

👉 Some versions focus more on WiFi/app monitoring rather than pure Bluetooth.

LiveFine

### Good for:

- Caregivers wanting app-based oversight
- More advanced scheduling + alerts

## Quick comparison

Feature	Bluetooth models (LiveFine)
App control	✅ Yes
Remote notifications	✅ Yes
Automatic dispensing	⚠️ Yes (timed carousel, not robotic)
Internet required	❌ (Bluetooth) / ✅ (WiFi versions)
Capacity	~28 days
Dosing frequency	Up to ~6–9 times/day

## Notes before buying

- Most “Bluetooth pill dispensers” are **carousel-style** (they rotate to release pills at set times).
- They **do not verify ingestion**—they only alert and dispense.
- Bluetooth models require the phone to be nearby; WiFi versions allow remote monitoring.
- Availability in Australia is usually via Amazon AU or imported units.

If you want, tell me:

- budget

- number of daily doses
- whether it's for elderly care / chronic medication

...and I can recommend the best specific model for your situation in Australia.
